MEETING OF THE LOST SON WITH

HIS MOTHER. They are winding up the pathway, They climb the rough hill-side; And the pale mother scans the group Close following the guide. They enter now the lowly house; She gazes, eager, on Each stranger face, then clasps him-

"This is my boy-my son!"

Awhile they stand in silence, In joy too deen for words: Then, as they sit, his hand in hers. Deep, bursting sols are heard: " Oh, sleepless nights, and auxious days-How many weary ones-I've wept, and prayed, and sought for you, My boy-my long-lost son!

" O, dreadful was the agony That burnt my blood and brain, When you was lost—and hundreds sought— But sought for you in vain. I feared my darling's precious flesh, Torn by that savage one, Would bait the bear; but you are safe, My own-my darling son!

"But when the search was past, and all Despaired to see you more, Still in my heart fond hope would live That life might not be o'er. And care for you has made me old. Before age should have come; But you are here, to sooth my age, My son-my long-lost son!

"A welcome to thy bride! though she Has darker skin than ours, Her foud, devoted cares. I can but thank my God for all The wonders he has done!" Then in an cestacy of tears She clasped her long-lost son. Paris, Nov. 30, '47.

THE STORY WHILLIES

From the Saturday Evening Post-THE ECCENTRIC LOVER;

It so chanced once upon a time, (to begin in the good old-fashioned povelistic style.) that I was travelling from the town of S-, where I had been making a short stay, to the city of ance was a stage-coach and four. Among the was one rather singular looking contlemm seated exactly in front of me, whom, as he is to figare somewhat largely in this sketch, I shall at once take the liberty of describing.

To begin with his age, I should judge he had

THIS may certify that the Partnership of the Firm of

"I nose what I Knows." - Vulgar saying. In ev'ry age since lib'ral arts had birth, And Science op'd her leaves for man's inspection The psychologic theorists of Earth, Led by Philosophy's profound direction, With all their force of thought have tried to find The local dwelling of the human mind.

Some, with much plausibility, declare The Abdomen 's the residence of thought, While others say they know it can't be there; By And then some specious arguments are brought To prove that in the Stomach there's a space Where food and fancy equally have place [

While others still, with equal learning blest, Maintain the understanding's in the Foot, A doctrine more absurd than all the rest-Which shuts the human mind up in a boot !--Confusing Nature's order-worse than that, It makes your foot your head, your boot your hat? But modern pysiologišts maintain

The intellect is altogether higher, And say the human mind dwells in the brain-With how much reason I shall not enquire, But, rapidly as may be, now proceed To give a newer and better creed.

A newer creed, I say-not only new-(Enough to satisfy one half mankind!) But I shall show you it is also true-As true as any doctrine you can find t Be not surprised !-the doctrine I propose Is that the human mind dwells in the Nose!

Hail mighty Nose !- thou much insulted part !-Thy praise, like thyself, shall soon be "blown !" And with the rise of Science and of Art. Thou shalt arise, 'till all the world shall own That thou wert form'd for nobler ends than these :-To carry Spectacles, take Snuff, and Sneeze!

Hall mighty Nose! thou Palace of the Soul! Thou never-failing index to the heart!-Thou Bishop of our life-made to control, With proper supervision every part, Assist the Card whose unpretending lays, Would gladly prove thy worth, and sing thy praise!

The Rhinologic Science—that's the name-Has had its votaries in every age, Although, as yet 'tis quite unknown to fame, And ne'er adorned the philosophic page; I mean to say the maxims of mankind Associate the human nose and mind;

Which proves the mind dependant on the nose, Just as the nose is pendant from the face; And this dependancy most clearly shows The nasal organ is the real place Where thoughts are born, and where they alway stay Until they bribe the lips and get away!-

But to the maxims—If a man's aggricved, "His nose is out of joint," we all exclaim; And if by any one a slight's received. He cries, " they've bridged nose, O what a shame ! And when a cunning demogague proposes To learn the people's minds, he "counts their noses!"

We say one a little too officious, Prying and peering with unblushing face, " He puts his nose in other people's dishes-He'd better keep it in its proper place!" And when a person very scornful grows,

You.'ll hear it said that " he turns up his nose!" Our doctrine proved-we now proceed to show How to determine characters at ouce. That every man with certainty may know Whether a stranger be a sage, or dunce,

Witty or dull, a courtier or a lout Just by inspection of the person's snout! The Roman nose betokens manly sense: The modest Snub bespeaks the gen'rous man-

But then, 't will never rise to eminence The least aspiring of the masal clan, With but a mod'rate love for fame and pelf-(I've got, they say, a snubbish nose myself.) The Aqualine proclaims the keenest wit, But full of guile as any hawk-or hawker!

The Turn-up nose-so ancient Horace writ-Is every where a scorner and a mocker: Some crooked end it secretly proposed-Don't hang your hat nor hopes on turn-up neses!

The Bottle-nose is commonly a feature One doesn't from parental blood inherit; And hence discloses not so much the nature Of mind and soul, as of come other " spirit !" Its meaning, therefore, is of small mail, As in drouthy time the sign must fail.

The Gimblet-nose betrays an intermed deri-Whene'er you see a gimblet-nose before you, It augurs that some new-opinion pedler, Or "special agent" now intends to bere ye : The very chap, who, when he pricks your wint. With hideons smile, cries "don't you see the point?"

Observe the point!-ye gods!-of course you do! You see it all transparently enough, And, worse than that, he'll make you feel it ite.
